CDN QUARTERLY I newsletter

Vol. XVIII No. 1 January 9, 2009 Single copy price \$5.00

The CDN Quarterly Sequence

The **CDN Quarterly** is part of the total CDN subscription package. One section of the **Quarterly** is sent every month to our **CDN** subscribers (along with their **CDN Monthly Supplement**), and the contents of the **Quarterly** rotate every three months. The following outlines the publishing schedule:

Quarterly 1: published Jan.; Apr.; July; Oct.; contains Half Cents, Large Cents, Half Dimes, Dimes through 1891, Twenty Cents, and Quarter Dollars through 1891; and all by date in standard grades!

Quarterly 2: published Feb.; May; Aug.; Nov.; contains Half Dollars through 1891, Dollars through 1873; Trade Dollars, Gold Dollars, Quarter Eagles through 1907, Three Dollar Gold; and all by date in standard grades!

Quarterly 3: published Mar.; June; Sept.; Dec.; contains Four Dollar Gold, Half Eagles through 1908; Eagles through 1907, Double Eagles through 1907; and all by date in standard grades!

Plus, the **Quarterly** regularly contains 'centerfolds' with: Proof Cents; Proof Two Cents; Proof Three Cent Silvers; Proof Three Cent Nickels; Proof Nickels; Proof Barber Dimes, Quarters, & Halves; Proof Dollars; and all by date in standard grades!

Combining the weekly, monthly and quarterly *Greysheets* included in your subscription, subscribers to the **CDN** now receive **current** pricing information on **every** regular issue U.S. coin; in fact, it is like receiving four copies of an annual pricing guide, with the advantage that prices are up-to-date when you receive them! All this, plus weekly and monthly updates on faster-moving issues.

Using the CDN Quarterly

CDN publications report prices based on national **dealer-to-dealer** buying and selling information. These **wholesale** prices result from our monitoring **all** possible **sight-seen** transactions and offers to buy or sell. The coins may be certified or "raw", but the grading **must adhere** to the current leading standard. Prices also consider activity in the certified **sight-unseen** market (PCGS & NGC). **CDN Quarterly** prices will be strongly influenced by **Sells** which are lower than listed levels. A higher **Bid** will normally raise **CDN Quarterly** prices, and a lower **Sell** will normally lower them.

The **CDN Quarterly** reports the **highest wholesale** prices seen nationally, which assume a **willing and knowledgeable** buyer. The actual buying offer for a rarer coin depends largely on the availability of a customer; on occasion, customer demand may be weaker for rarer dates or varieties, and dealers must consider this before purchasing for inventory. Rarity also plays a key role in selling prices, with a substantial premium asked for extremely scarce coins; the wholesale asking price may be multiples of the listed **Bid** price. Prices on more-frequently traded coins will reflect the greater activity; prices on less-frequently traded coins may reflect last-known information. These **wholesale** prices should not be misinterpreted by **retail** clients as levels at which coins can be bought or sold; wholesale buying requires a substantial market presence.

Prices listed are for typical examples; numismatists expect a wide variation in looks and attractiveness within a particular grade. A coin must stand on its own merits; this is the heart of **sight-seen** trading. Bronze coinage is especially susceptible to spotting, and severely spotted issues may command a lower price. Prices will also be affected by cleaning, planchet flaws or porosity, rim nicks, and other factors in the final grading of a coin. Prices listed are for 'no-problem' coins.

A tilde (" ~ ") indicates no reliable pricing information is available; an "n/m" indicates that none were made. Prices in the **XF** columns are for coins graded **XF40**; **AU** columns are for coins graded **AU50**.

The CDN Quarterly Sequence

The **CDN Quarterly** is part of the total CDN subscription package. One section of the **Quarterly** is sent every month to our CDN subscribers (along with their **CDN Monthly Supplement**), and the contents of the **Quarterly** rotate every three months. The following outlines the publishing schedule:

Quarterly 1: published Jan.; Apr.; July; Oct.; contains Half Cents, Large Cents, Half Dimes, Dimes through 1891, Twenty Cents, and Quarter Dollars through 1891; and all by date in standard grades!

Quarterly 2: published Feb.; May; Aug.; Nov.; contains Half Dollars through 1891, Dollars through 1873; Trade Dollars, Gold Dollars, Quarter Eagles through 1907, Three Dollar Gold; and all by date in standard grades!

Quarterly 3: published Mar.; June; Sept.; Dec.; contains Four Dollar Gold, Half Eagles through 1908; Eagles through 1907, Double Eagles through 1907; and all by date in standard grades!

Plus, the **Quarterly** regularly contains 'centerfolds' with: Proof Cents; Proof Two Cents; Proof Three Cent Silvers; Proof Three Cent Nickels; Proof Nickels; Proof Barber Dimes, Quarters, & Halves; Proof Dollars; and all by date in standard grades!

Combining the weekly, monthly and quarterly *Greysheets* included in your subscription, subscribers to the **CDN** now receive **current** pricing information on **every** regular issue U.S. coin; in fact, it is like receiving four copies of an annual pricing guide, with the advantage that prices are up-to-date when you receive them! All this, plus weekly and monthly updates on faster-moving issues.

Using the CDN Quarterly

CDN publications report prices based on national **dealer-to-dealer** buying and selling information. These **wholesale** prices result from our monitoring **all** possible **sight-seen** transactions and offers to buy or sell. The coins may be certified or "raw", but the grading **must adhere** to the current leading standard. Prices also consider activity in the certified **sight-unseen** market (PCGS & NGC). **CDN Quarterly** prices will be strongly influenced by Sells which are lower than listed levels. A higher Bid will normally raise **CDN Quarterly** prices, and a lower Sell will normally lower them.

The **CDN Quarterly** reports the **highest wholesale** prices seen nationally, which assume a **willing and knowledgeable** buyer. The actual buying offer for a rarer coin depends largely on the availability of a customer; on occasion, customer demand may be weaker for rarer dates or varieties, and dealers must consider this before purchasing for inventory. Rarity also plays a key role in selling prices, with a substantial premium asked for extremely scarce coins; the wholesale asking price may be multiples of the listed Bid price. Prices on more-frequently traded coins will reflect the greater activity; prices on less-frequently traded coins may reflect last-known information. These **wholesale** prices should not be misinterpreted by **retail** clients as levels at which coins can be bought or sold; wholesale buying requires a substantial market presence.

Prices listed are for typical examples; numismatists expect a wide variation in looks and attractiveness within a particular grade. A coin must stand on its own merits; this is the heart of **sight-seen** trading. Bronze coinage is especially susceptible to spotting, and severely spotted issues may command a lower price. Prices will also be affected by cleaning, planchet flaws or porosity, rim nicks, and other factors in the final grading of a coin. Prices listed are for 'no-problem' coins.

A tilde ("~") indicates no reliable pricing information is available; an "n/m" indicates that none were made. Prices in the XF columns are for coins graded XF40; AU columns are for coins graded AU50.

The CDN Quarterly Sequence

The **CDN Quarterly** is part of the total CDN subscription package. One section of the **Quarterly** is sent every month to our CDN subscribers (along with their **CDN Monthly Supplement**), and the contents of the **Quarterly** rotate every three months. The following outlines the publishing schedule:

Quarterly 1: published Jan.; Apr.; July; Oct.; contains Half Cents, Large Cents, Half Dimes, Dimes through 1891, Twenty Cents, and Quarter Dollars through 1891; and all by date in standard grades!

Quarterly 2: published Feb.; May; Aug.; Nov.; contains Half Dollars through 1891, Dollars through 1873; Trade Dollars, Gold Dollars, Quarter Eagles through 1907, Three Dollar Gold; and all by date in standard grades!

Quarterly 3: published Mar.; June; Sept.; Dec.; contains Four Dollar Gold, Half Eagles through 1908; Eagles through 1907, Double Eagles through 1907; and all by date in standard grades!

Plus, the **Quarterly** regularly contains 'centerfolds' with: Proof Cents; Proof Two Cents; Proof Three Cent Silvers; Proof Three Cent Nickels; Proof Nickels; Proof Barber Dimes, Quarters, & Halves; Proof Dollars; and all by date in standard grades!

Combining the weekly, monthly and quarterly *Greysheets* included in your subscription, subscribers to the **CDN** now receive **current** pricing information on **every** regular issue U.S. coin; in fact, it is like receiving four copies of an annual pricing guide, with the advantage that prices are up-to-date when you receive them! All this, plus weekly and monthly updates on faster-moving issues.

Using the CDN Quarterly

CDN publications report prices based on national **dealer-to-dealer** buying and selling information. These **wholesale** prices result from our monitoring **all** possible **sight-seen** transactions and offers to buy or sell. The coins may be certified or "raw", but the grading **must adhere** to the current leading standard. Prices also consider activity in the certified **sight-unseen** market (PCGS & NGC). **CDN Quarterly** prices will be strongly influenced by **Sells** which are lower than listed levels. A higher Bid will normally raise **CDN Quarterly** prices, and a lower Sell will normally lower them.

The **CDN Quarterly** reports the **highest wholesale** prices seen nationally, which assume a **willing and knowledgeable** buyer. The actual buying offer for a rarer coin depends largely on the availability of a customer; on occasion, customer demand may be weaker for rarer dates or varieties, and dealers must consider this before purchasing for inventory. Rarity also plays a key role in selling prices, with a substantial premium asked for extremely scarce coins; the wholesale asking price may be multiples of the listed Bid price. Prices on more-frequently traded coins will reflect the greater activity; prices on less-frequently traded coins may reflect last-known information. These **wholesale** prices should not be misinterpreted by **retail** clients as levels at which coins can be bought or sold; wholesale buying requires a substantial market presence.

Prices listed are for typical examples; numismatists expect a wide variation in looks and attractiveness within a particular grade. A coin must stand on its own merits; this is the heart of **sight-seen** trading. Bronze coinage is especially susceptible to spotting, and severely spotted issues may command a lower price. Prices will also be affected by cleaning, planchet flaws or porosity, rim nicks, and other factors in the final grading of a coin. Prices listed are for 'no-problem' coins.

A tilde ("~") indicates no reliable pricing information is available; an "n/m" indicates that none were made. Prices in the XF columns are for coins graded XF40; AU columns are for coins graded AU50.

Buying or Selling Certified Coins?

If you answered yes, then you need to subscribe to the Certified Coin Dealer Newsletter — immediately. The CCDN, or *Bluesheet*, is the only publication that reports the buying (Bid) and selling (Market) prices of third party graded coins. PCGS, NGC, ANACS, ICG, SEGS and others are all accurately and independently reported. You need to know the dramatic differences in prices for each of the major grading services if you want to successfully buy or sell in today's market. The actual money you save from making informed buying and selling decisions can often pay for the cost of a subscription many times over. Subscribe today for at least 6 months and receive a free copy of the 2009 Numismatic Dealer Directory — over 150 pages including: coin dealers, auction houses, supplies, shows and much more.

1. Read in-depth market analyses and insights to trading certified coins.
2. Weekly charts and graphs for an instant snap-shot of the current market.
3. All major third-party grading and certification services are covered.
4. Know what slabs are hot before the next show or auction.
5. Be aware of the price differences between the grading services.
6. See what coins are actually selling for at public auctions.

Can you really afford to ignore all of this valuable information?

The CDN Quarterly Sequence

The **CDN Quarterly** is part of the total CDN subscription package. One section of the **Quarterly** is sent every month to our **CDN** subscribers (along with their **CDN Monthly Supplement**), and the contents of the **Quarterly** rotate every three months. The following outlines the publishing schedule:

Quarterly 1: published Jan.; Apr.; July; Oct.; contains Half Cents, Large Cents, Half Dimes, Dimes through 1891, Twenty Cents, and Quarter Dollars through 1891; and all by date in standard grades!

Quarterly 2: published Feb.; May; Aug.; Nov.; contains Half Dollars through 1891, Dollars through 1873; Trade Dollars, Gold Dollars, Quarter Eagles through 1907, Three Dollar Gold; and all by date in standard grades!

Quarterly 3: published Mar.; June; Sept.; Dec.; contains Four Dollar Gold, Half Eagles through 1908; Eagles through 1907, Double Eagles through 1907; and all by date in standard grades!

Plus, the **Quarterly** regularly contains 'centerfolds' with: Proof Cents; Proof Two Cents; Proof Three Cent Silvers; Proof Three Cent Nickels; Proof Nickels; Proof Barber Dimes, Quarters, & Halves; Proof Dollars; and all by date in standard grades!

Combining the weekly, monthly and quarterly *Greysheets* included in your subscription, subscribers to the **CDN** now receive **current** pricing information on **every** regular issue U.S. coin; in fact, it is like receiving four copies of an annual pricing guide, with the advantage that prices are up-to-date when you receive them! All this, plus weekly and monthly updates on faster-moving issues.

Using the CDN Quarterly

CDN publications report prices based on national **dealer-to-dealer** buying and selling information. These **wholesale** prices result from our monitoring **all** possible **sight-seen** transactions and offers to buy or sell. The coins may be certified or "raw", but the grading **must adhere** to the current leading standard. Prices also consider activity in the certified **sight-unseen** market (PCGS & NGC). **CDN Quarterly** prices will be strongly influenced by Sells which are lower than listed levels. A higher Bid will normally raise **CDN Quarterly** prices, and a lower Sell will normally lower them.

The **CDN Quarterly** reports the **highest wholesale** prices seen nationally, which assume a *willing and knowledgeable* buyer. The actual buying offer for a rarer coin depends largely on the availability of a customer; on occasion, customer demand may be weaker for rarer dates or varieties, and dealers must consider this before purchasing for inventory. Rarity also plays a key role in selling prices, with a substantial premium asked for extremely scarce coins; the wholesale asking price may be multiples of the listed Bid price. Prices on more-frequently traded coins will reflect the greater activity; prices on less-frequently traded coins may reflect last-known information. These **wholesale** prices should not be misinterpreted by **retail** clients as levels at which coins can be bought or sold; wholesale buying requires a substantial market presence.

Prices listed are for typical examples; numismatists expect a wide variation in looks and attractiveness within a particular grade. A coin must stand on its own merits; this is the heart of **sight-seen** trading. Bronze coinage is especially susceptible to spotting, and severely spotted issues may command a lower price. Prices will also be affected by cleaning, planchet flaws or porosity, rim nicks, and other factors in the final grading of a coin. Prices listed are for 'no-problem' coins.

A tilde ("~") indicates no reliable pricing information is available; an "n/m" indicates that none were made. Prices in the XF columns are for coins graded XF40; AU columns are for coins graded AU50.
